PROFESSIONAL SUMMARY

Computer Science and Engineering student with a 7.5 CGPA and practical exposure to Java, data analytics, web development, and AI-based project development. Experienced through internships and academic projects in data analysis, software development, and emerging AI technologies. Interested in entry-level opportunities where I can apply problem-solving, analytical, communication, and technical skills while continuously learning and contributing to organizational goals.

EDUCATION

Bachelor of Engineering – Computer Science and Engineering | Mar Ephraem College of Engineering and Technology
Expected 2027

CGPA: 7.5/10 | No Backlogs

Higher Secondary – Computer Science

SSLC: 94% | Higher Secondary: 83%

TECHNICAL SKILLS

Programming: Java, JavaScript, Python

Web: HTML, CSS, JavaScript, Node.js

Data: Excel, Data Analysis, Data Visualization, SQL

AI/ML: Computer Vision, Edge AI, AI/ML Fundamentals

Tools: Git, GitHub, IntelliJ IDEA, VS Code, Canva

Other: Responsive Web Design, Database Fundamentals, Problem Solving

INTERNSHIP EXPERIENCE

Data Analyst Intern | Ayoti Technologies, Infopark, Ernakulam

- Worked with data analysis and visualization tasks to identify useful patterns and insights.
- Gained practical exposure to data handling, reporting, and analytical workflows.
- Developed understanding of how data supports business and operational decisions.

Java Intern | IT Desk, Marthandam

- Gained practical experience with Java programming fundamentals and object-oriented programming.
- Worked on programming exercises and strengthened logical problem-solving skills.

PROJECTS

BPO Management System | Node.js, JavaScript, HTML, CSS, Database

- Developed a web-based system concept for managing BPO operations, records, and workflows.
- Designed a structured responsive interface and maintained the project using GitHub.

Glow – Sign Language Conversion System | AI/ML, Computer Vision

- Proposed an AI-based system to recognize sign language gestures and convert them into understandable text using computer vision and machine-learning techniques.

SafeSphere – Edge AI Co-Driver for Predictive Road Safety | Edge AI, Computer Vision, Automotive

- Proposed an Edge AI-based vehicle safety system to identify potential road hazards and provide timely alerts, with local processing to reduce dependence on continuous cloud connectivity.

CERTIFICATIONS / ACTIVITIES

- Participated in technical innovation and hackathon-oriented project development.
- Developed academic and personal projects involving AI, web technologies, and data analytics.
- Maintained projects and portfolio using GitHub and web deployment technologies.

SOFT SKILLS

Problem Solving | Analytical Thinking | Teamwork | Communication | Adaptability | Time Management | Quick Learning
